\*Information is provided from the respective manufacturer and is subject to change without notice.

A.R.T. uses only LCD displays in our digital directory projects and are available in a variety of sizes from 10" to 46" (measured diagonally) in widescreen and traditional orientations. While plasma displays are relatively inexpensive, text-based displays cause significant burn-in and as such, should be avoided. Today's LCD displays do not have this problem and can be relied on for years of use. Moreover, today's latest LCDs include built-in networking features which means you only need one server for multiple monitors across multiple locations!

We use only industrial-grade displays in our projects that include standard 3-year warranties (with options for additional warranty periods as needed). Please contact an A.R.T. sales representative for more information and a free consultation.
