

DART™ GLASSVU and TRANSVU

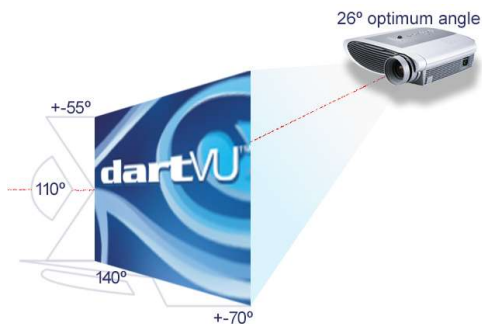

The GlassVu and TransVu products have the unique ability to display high quality images to help you deliver your message the right way every time. Lightweight and durable, these products are ideal for retail, trade shows, architectural design, museums, and any other application where the attention of your audience is paramount.

GlassVu is the most advanced rear projection display available. With a contrast ratio of 500:1 the GlassVu offers unprecedented images in full daylight.

TransVu is the newest in the DART line of high quality projection displays. With no distracting lines or pixels and available up to 100", it is the premier transparent display on the market.

Available in sizes from 40" to 110", in traditional and widescreen orientations.
